August 27, 1990
DOE-1793-90

Dear Neighbor:

You are cordially invited to attend the next in a series of U. S. Department of Energy Community Meetings focusing on cleanup plans and activities at the Feed Materials Production Center. This meeting, which will be held at the FMPC on September 22, 1990, will feature an expanded format that will include a site open house and tours of several areas of the facility.

Like previous community meetings, the September 22 event will provide a forum in which you can get information, express your views, and ask questions about the various alternatives being considered as part of the FMPC cleanup and environmental restoration effort. The open house will provide still another dimension to the community meeting by allowing visitors to see for themselves what has been accomplished in terms of cleanup at the FMPC.

The meeting will be held from 2-4 p.m. and will include reports on the status of near-term removal actions and long-range cleanup plans that are being developed in a Remedial Investigation/Feasibility Study being conducted at the FMPC. Managers in charge of the cleanup will be available to discuss cleanup activities and answer your questions. The Ohio and U. S. Environmental Protection Agencies have been invited to participate.

The open house will be held from 9 a.m. until 5 p.m. and will include numerous displays and exhibits focusing on the shift in emphasis at the FMPC. Representatives of DOE and Westinghouse Materials Company of Ohio will be on hand to discuss current activities at the site. Technical experts from Advanced Sciences Inc. and International Technology Corp., who are conducting the RI/FS, and Ralph M. Parsons Co., which was recently selected to design the remediation projects at the site, will also participate.

Please join us for a full day of activities on September 22. We look forward to sharing information about what has been accomplished and what we are planning in our environmental restoration efforts at the FMPC.

Gerald W. Westerbeck
FMPC Site Manager
